

# VR EXPEDITIONS LINKED TO SEC BIOLOGY

## Human Impact on the Environment

6.1s Identify the major threats to biodiversity (e.g. climate change; habitat loss; overexploitation; invasive species; and pollution).

6.2u Recognise that the climate influences the conditions of different habitats that in turn affect the distribution of species.

6.1ag Understand that pollution can damage ecosystems by reducing biodiversity.

## Microbes: Microscopic Wonders

4.1x Identify that infectious diseases in both animals and plants can either be viral, bacterial or fungal.

## Wild Plant Habitats in Malta

6.3e Distinguish between the terms "alien", "indigenous" and "endemic" and give local examples for each.
