COURSE & TRAINING: AI and the 6Cs for Future-Ready Teaching
(Ljubljana, Slovenia)

TESTIMONIAL

Cheyenne Brincat, Primary Teacher, St Augustine Primary, Marsa

Going to Ljubljana, Slovenia, for my first Erasmus+ experience was truly unforgettable. I arrived full of excitement and curiosity, but what I gained was far beyond what I had imagined. It wasn't only about developing new teaching approaches, it was also about the wonderful people I met, the friendships I built, and the cultural exchanges that opened my heart and mind to new perspectives. Being surrounded by people from different backgrounds made me realise how much we can grow when we step out of our comfort zones and embrace diversity.

A key highlight was exploring the 6C's in depth. At first, I thought of them as separate skills, but as the week progressed, I began to see how naturally they connect and support one another. It was fascinating to reflect on how collaboration enhances creativity, or how critical thinking supports communication. I also discovered practical ways to integrate them into lessons, particularly with the help of AI tools. Activities like the *Lost at Sea* game really challenged my problem-solving skills and made me more aware of how I approach decision-making. Group discussions, on the other hand, reminded me of the importance of listening, sharing experiences, and learning from one another's perspectives.

Being introduced to AI platforms such as Claude, MagicSchool, and HeyGen was equally exciting. Exploring these tools gave me fresh ideas on how technology can spark curiosity, improve engagement, and support 21st-century learning in the classroom. What struck me most was how easily the 6C's can be connected with AI to create lessons that are not only innovative but also meaningful for students.

This Erasmus+ journey has left me feeling motivated, inspired, and grateful. It has not only enriched me as a teacher but also as a person, reminding me of the power of connection, openness, and lifelong learning.
