## TESTIMONIAL

### **Karen Abela, LSE & St Joseph Primary School Blata l-Bajda**

Participating in the Erasmus mobility program was an enriching and inspiring experience that greatly contributed to my growth as a Learning Support Educator. The course focused on the 6Cs of education – Critical Thinking, Creativity, Collaboration, Communication, Citizenship, and Character – and provided practical strategies to integrate these competencies into the classroom. For each “C,” we explored engaging games and activities that can be adapted to meet the diverse needs of learners, making lessons interactive and student-centered.

A key highlight of the course was the hands-on introduction to AI tools that support teaching and learning. Tools such as Magic School, Eduaide.ai, Invideo, ChatGPT, and Claude showed me how technology can enhance digital access and inclusion, personalize learning, and create more engaging educational experiences. I learned to design differentiated resources, generate lesson plans and interactive games, and develop multimodal materials that support students with literacy difficulties, EAL learners, and other diverse needs.

The collaborative workshops and discussions with other educators were equally valuable, providing insights, inspiration, and practical examples that I can immediately apply in my work. Overall, this Erasmus experience strengthened my digital competence, creativity, and confidence as a teacher, equipping me with innovative tools and strategies to make learning more inclusive, engaging, and effective for all student. Thank you for this wonderful opportunity.
