COURSE & TRAINING: AI and Digital Leadership in Education

TESTIMONIAL

Sarah Cremona, Deputy Head at St Joseph School Blata

The training course “AI and Digital Leadership in Education” held in Ghent was an inspiring and transformative professional development experience. It equipped us with the knowledge, skills, and confidence to lead schools through digital transformation while embracing the opportunities offered by Artificial Intelligence (AI). Throughout the mobility period, we participated in engaging lectures, hands-on workshops, discussed ethical AI use, and strategies for fostering innovation and inclusion in education.

By the end of the course, we had developed a solid understanding of how to apply digital leadership to promote innovation and effective technology integration within our schools. We also gained practical experience using a range of AI tools—such as ChatGPT, Perplexity, Socrative, Gamma, Ideogram, Napkin, Mentimeter, Otter, and HeyGen—to enhance lesson planning, grading, student feedback, and administrative efficiency. These tools demonstrated how technology can boost student engagement through interactive, student-centered learning approaches.

The course also emphasized the ethical implications of AI, particularly regarding privacy, bias, and accountability. Working collaboratively, we began drafting an action plan for responsible AI use in schools. Overall, the Ghent experience was enlightening and empowering, preparing us to become confident digital leaders driving meaningful and inclusive change in education.
