COURSE & TRAINING: AI and Digital Leadership in Education

TESTIMONIAL

Rachel Grech, Head of School at St Joseph Blata Primary

Participating in the Erasmus+ project *AI in Educational Leadership* was an enriching and transformative experience. The course provided a comprehensive insight into how Artificial Intelligence functions and how to harness its full potential through effective prompt engineering. It was particularly valuable in demonstrating how increased digital access fosters inclusion within our schools, ensuring that no student is left behind.

We explored practical strategies to enhance digital literacy across our institutions—both for administrators and teaching staff—ultimately aiming to boost student engagement through innovative tools and platforms. The sessions were hands-on and highly relevant to our daily leadership roles.

A key highlight was the in-depth discussion on European and Maltese policies regarding AI in education. These frameworks guided us in collaboratively drafting a tailored AI policy for Malta's primary church schools, ensuring alignment with ethical and legal standards. The ethical implications and legal considerations surrounding AI in education were thoughtfully examined, prompting meaningful reflection and dialogue.

Overall, the project empowered us with the knowledge and confidence to lead our schools into a digitally inclusive future. It was a wonderful opportunity to collaborate, learn, and grow as educational leaders in an ever-evolving technological landscape.
